PROFESSIONAL SUMMARY

Solo/indie game developer with 2+ years of experience building Android games in Unity using C#. Shipped 5 independent projects from concept to release, handling gameplay programming, mechanics design, and deployment. Currently pursuing a Software Engineering degree while continuing to build and publish games independently. Comfortable working solo across the full development pipeline and eager to bring that ownership and hands-on experience to a team environment.

SKILLS

- Programming Language: C#
- Game Engine: Unity (2D & 3D, Android deployment)
- Version Control: Git (basic proficiency)
- Core Competencies: Gameplay programming, game mechanics design, debugging, solo project ownership, publishing to Android/itch.io

EXPERIENCE

Independent Game Developer (Solo / Indie)

Self-Employed • 2+ Years

- Designed, developed, and published 5 Android games independently using Unity and C#.
- Owned the full development cycle for each project: gameplay programming, mechanics design, testing, and deployment.
- Managed source code and project versions using Git.
- Published projects on itch.io and maintained an active developer portfolio and GitHub presence.

PROJECTS

5 Android games developed and published solo (Unity / C#). Full project details, gameplay videos, and downloads available on my portfolio website and itch.io page linked above.

EDUCATION

Bachelor of Software Engineering

Mirpur University of Science and Technology (MUST) • 2nd Semester (In Progress)
